Markup Assist is a new AutoCAD user experience that helps you understand the intent of your design, and more importantly, provides it to you within the drawing. AutoCAD applies both your design intent and engineering intent to the document, so that the resulting drawing represents exactly the design you had in mind. New features in AutoCAD Move and Copy: With AutoCAD Move, an application can animate the move of a selection of graphics within a drawing, rather than moving them individually. AutoCAD Move can animate the insertion of a graphic or placement of a graphic relative to a coordinate system, and can repeat the animation in an infinite loop. (video: 1:45 min.)
