A book about the Cmake package for Unix-based operating systems like Linux, FreeBSD, and Solaris. The present invention relates to a new and distinct cultivar of Mandevilla plant botanically known as Mandevilla hybrida and hereinafter referred to by the cultivar name 'Balsi White.' The new cultivar is a product of a planned breeding program conducted by the Inventor in De Lier, The Netherlands. The objective of the breeding program is to create new compact Mandevilla cultivars with numerous inflorescences and attractive flower

colors. The new cultivar originated from a cross-pollination made by the Inventor in November, 2000 of a proprietary selection of *Mandevilla hybrida* identified as code number 'JV-198,' not patented, as the female, or seed parent, with a proprietary selection of *Mandevilla hybrida* identified as code number 'JV-251,' not patented, as the male, or pollen, parent. The new cultivar was discovered and selected by the Inventor as a single flowering plant within the progeny of the stated cross-pollination in a controlled environment in De Lier, The Netherlands, in March, 2001. Asexual reproduction of the new cultivar by cuttings since March, 2001, in De Lier, The Netherlands, has shown that the unique features of this new *Mandevilla* are stable and reproduced true to type in successive generations.

Q: Stuck with a problem with W3C mark-up validator My PHP site has a form where user can send an email with a list of data:

```
include('d2/config.php'); $result =
mysql_query("SELECT * FROM `professor`
ORDER BY id"); $total =
mysql_num_rows($result); $base = 1;
```

```
while($row = mysql_fetch_array($result)) {  
    $list.= ". $row['name']."; $list.= "  
$row['email']."; $list.= ". $row['subject'].";  
    $list.= ". $row['message'].'
```
