WARNING: No PATCH or KEYGEN is required to run the program.. you may download it here . Show HN: Karma - A console application inspired by IFTTT - wanganiz ===== briandear Any chance of creating a Chrome app version? ~~~ wanganiz Noted. ~~~ briandear What are some use cases for this beyond IFTTT? Like a personal chef? ~~~ wanganiz It'd get the job done for custom webapps like this one! ----- wanganiz I'm open to feedback. Thanks! Q: how to get from data collection appending information to a column in laravel I have a requirement to do saving, updating, deleting for each row data from data collected appending information in database table. but there is no database relation with one table. here is my code of collection user_type_id not present in user table. if it can't be solve how to make that database relation. How i make this? class UserType extends Model { protected \$table = 'user_type'; protected \$primaryKey = 'type_name'; protected \$fillable = ['type_name']; public function users() { return \$this->hasMany('App\User', 'user_type_id'); } } class User extends Model { protected \$table = 'user'; protected \$primaryKey = 'id'; protected \$fillable = ['first_name', 'last_name', 'phone_number', 'email', ']
